

Stamped Designs ECD Star Ornaments

Ornament Construction (both sizes)

1. Using a fine point embossing tool, go over the scores lines on the star pieces (you need 2 of each size for each ornament).
2. Fold the tabs underneath on both pieces.
3. The center score lines are folded as valley folds.
4. Complete one point of the star at a time – apply glue from a fine-tip glue bottle to the corresponding tabs for that point and glue the sides together. Continue for all 6 star tips.
5. After ensuring that the glue is dry and the points are secured on both sides, hold 2 opposite points and squeeze the sides together – which will start to push the center out. Do this for all 3 pairs of points. Repeat until the star is sufficiently popped out.
6. You can carefully trim the ends of the points with scissors if needed.
7. To make the ornament hanger, first glue the two pieces together at the circle. Then apply glue to the insides and attach on one point of the star.

Stamped Designs ECD Star Ornaments

Large Star Decorations

1. Take the 3 red flowers and shape the petals curling the tips down and the centers out. Attach them to the front of the star ornament as shown, with the larger one in the middle and the 2 smaller ones on either side.
2. For the leaves, pull off 2 green leaves from the larger piece and the smaller piece. Glue the 2 larger ones under the large flower and one each of the smaller leaves under each small flower.
3. Snip off all 3 of the shiny gold circles and attach one to each flower with wet glue.

Small Star Decorations

1. Shape the blue flower with your fingers, curling the petals in the same way as done with the red ones above. Attach to the center of the smaller, white star.
2. Snip off 2 larger green leaves and attach under the blue flower as shown.
3. Snip off one shiny gold circle and attach to the center of the blue flower.
